

CHO1022 IR TARGET

CHO1022 IR target is ideal for mounting in cupboards, cabinets, Panels or racks, to control A/V devices behind closed doors.

SPECIFICATIONS & FEATURES:

1. Infrared frequency bandwidth: $38K \pm 2K$ Hz
2. Control range: 80 feet indoors, 15 to 20 feet in direct sunlight
3. Reception angle: + or – 45 degree off axis
4. Power requirement: DC 12V, 500mA
5. Slim, unobtrusive styling: .5" diameter x 2" depth
6. LED indicator for IR response
7. Compatible with most standard remote controls

MOUNTING & INSTALLATION:

Drill a .5" hole in flat surface for threading the unit through and then tighten up from the rear with the nut.

The CHO1022 is designed to be connected to the input terminals of the CHO1020.

This unit may be connected in parallel to up to 3 other IR targets when connected to the Model RPT-104 distribution hub.
